Professional Summary

Senior Frontend Engineer with 9+ years of experience building, optimizing, and maintaining scalable web applications with a strong focus on Angular (v17) and React ecosystems. Actively upskilling at the intersection of frontend engineering and AI — building AI-powered applications using the Claude API, exploring agentic patterns, and integrating LLM-based features into modern web interfaces. Proven expertise in designing high-performance, accessible, and responsive UIs while collaborating with designers and product managers in Agile teams. Committed to clean, maintainable code and continuous learning in the evolving AI-enhanced frontend landscape. Fluent in English (C1) and German (B1, actively pursuing B2).

Technical Skills

Frontend: Angular (v17), React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Redux, JSON

Backend: Node.js, Express.js (Familiarity), Microservices

Databases: SQL (MySQL, PostgreSQL), NoSQL (MongoDB)

Cloud Infrastructure: AWS (EC2, S3, Lambda), Docker, CI/CD

Testing: Jasmine, Karma, Accessibility Testing

Development Practices: Agile/Scrum, Responsive Design, Clean Code Development, Software Architecture Best Practices, GDPR Compliance, AI Integration

AI & LLM Integration: Claude API (Anthropic), Prompt Engineering, Agentic Patterns, AI-powered App Development

Professional Experience

Senior Software Engineer | Farmly Software Pvt Ltd, Remote | 03/2024 – 12/2024

- Developed a scalable React-based web application for a searchable product catalogue, focusing on performance, usability, and responsive design.
- Collaborated closely with designers and backend team to build user-friendly interfaces with seamless data flow.
- Improved frontend performance and load efficiency through optimized rendering and API integration.
- Maintained clean, modular, and reusable code aligned with modern frontend best practices.

Senior Software Engineer | Mitel Communications, Bengaluru, India | 7/2021 – 02/2024

- Developed MIVB Business Console using Java and JavaFX as Frontend. Solving critical bugs and developing enhanced features.
- Appreciated on providing a JavaFX version issue fix by identifying the package build process.
- Created COCOA component library for UI reusability across projects, collaborating with product managers to deliver high-quality features.
- Implemented unit test coverage with Jasmine and Karma, and managed AWS Lambda deployments for scalable applications.

Senior Member Technical Staff | NEC India, Bengaluru, India | 04/2018 – 06/2021

- Led development of Archive app (Angular V5), integrating RESTful APIs and geolocation tagging, boosting speed by 40% and ensuring responsive design with modern CSS techniques.
- Migrated applications to modern frameworks, collaborating with designers and product teams to refine features and maintain documentation.
- Migrated an application from Angular JS to Angular (v5), with enhanced user experience.

Software Engineer | Tech Mahindra, Bengaluru, India | 08/2015 – 03/2018

- Developed Project Coffee Bean (AngularJS) to visualize sensor data, adding QR functionality and optimizing front-end-backend interactions with Java.
- Automated Airbus production workflow, with Angular JS application and by reducing human intervention by 70% and improving efficiency.
- Tested the application in real-time at AIRBUS Toulouse, ensuring seamless functionality.

Key Projects

AI Research Agent (2026)

- Built an autonomous AI agent that researches any topic by breaking it into multiple search queries, analyzing findings, and producing a structured report — all in real time.
- Developed as a solo learning project exploring AI model integration, agentic design patterns, and streaming with the Claude API using Python and Angular.

Connect Account Console (Angular v17) 2022

- Designed scalable application with responsive UIs, integrating RESTful APIs for data management.
- Promoted Agile practices, ensuring high-quality delivery with product teams.

Miya – Mitel Integrated Chatbot

- Built a chatbot with Amazon Lex and AWS Lambda as a part of Hackathon. Conducted end-to-end testing to ensure proper workflow.

Integrated Coherent Production Line (iCOPL) 2019

- Built AngularJS application to automate workflows, reducing intervention by 50% and ensuring real-time data flow across multiple workstations. Enhanced application performance, reduced data transfer time and improved operational efficiency.

Project Coffee Bean (PCB) 2017

- Implemented KPIs for management, using QR scanning to visualize the entire coffee lifecycle. From planting to market. Presented the application to the CEO of Tech Mahindra and Nestle.

Education

MBA in Business Analytics

03/2020 – 07/2021

Alliance University, India

Bachelor of Engineering: Electronics and Communications

07/2011 – 05/2015

Visvesvaraya Technological University, India

Languages

English: C1

German: B1, actively pursuing B2

Certificates

Building with Claude API, Anthropic (2026)

AI for Frontend Developers, Coursera (Completed 2025)

React Advanced Course, Udemy

Angular 11, NEC India Pvt Ltd

German B1, Zebus e.V.

German A1, Goethe
